MINUTES
HEALTH COMMISSION MEETING
Tuesday August 3, 2021 4:00 p.m.
Remote Meeting via Webex Event

1) CALL TO ORDER

Present: Commissioner Dan Bernal President
Commissioner Laurie Green, MD, Vice President
Commissioner Edward A. Chow M.D.
Commissioner Cecilia Chung (
Commissioner Susan Belinda Christian, J.D.
Commissioner Suzanne Giraud, Ph.D
Commissioner Tessie Guillermo (Left meeting at 6:25pm)

The meeting was called to order at 4:01pm.

2) APPROVAL OF THE MINUTES OF THE HEALTH COMMISSION MEETING OF JULY 20, 2021.

Action Taken: The Health Commission unanimously approved the July 20, 2021 minutes.

3) DIRECTOR'S REPORT

Grant Colfax, MD, DPH Director of Health, presented the item.

Contra Costa, Santa Clara, and San Francisco County Public Health Officials urge employers to consider requiring employee vaccination to promote COVID-safe workplaces

With COVID-19 cases rapidly on the rise, leaving unvaccinated individuals at risk for serious illness and death, the health officers of Contra Costa, Santa Clara, and San Francisco counties strongly urge all employers to consider implementing workplace COVID-19 safety policies that require their workforce to get fully vaccinated as soon as possible.

For any employees who are not yet fully vaccinated, employers must require and enforce masking under current state law. In addition, employers are encouraged to require frequent COVID-19 testing of unvaccinated employees.

The relaxing of community and workplace transmission protections since mid-June in California and the rapid spread of the Delta variant of COVID-19, which is much more contagious than the original strains of the virus,

have led to significantly higher case rates, and a higher risk of transmission at businesses and workplaces as a result.

Employers can play a critical role in ensuring a safe workplace environment and boosting vaccination rates among working-age individuals by requiring vaccination as a condition of employment, with very limited exceptions for medical exemptions or strongly held religious beliefs.

Local and national data show that fully vaccinated people are far less likely to catch COVID-19 or require hospitalization than people who are unvaccinated.

Requiring documentation of COVID-19 vaccination rather than self-attestation is recommended as a best practice for employers to ensure workers are adhering to the appropriate workplace protections.

Current state and federal employment law support employers requiring documentation of vaccination status, requiring vaccination as a condition of employment, and requiring additional safety precautions including masking and frequent testing for employees who are unvaccinated. Resources are available via the [California Department of Fair Employment and Housing](#).

For information about finding a safe, free and convenient COVID-19 vaccine, visit sf.gov/getvaccinated.

Counties of Alameda, Contra Costa, Marin, San Francisco, San Mateo, Santa Clara, Sonoma, and the City of Berkeley recommend masking indoors for everyone as a precaution against increased circulation of COVID-19

With cases of COVID-19 rising locally and increased circulation of the highly transmissible Delta variant, the Counties of Alameda, Contra Costa, Marin, San Francisco, San Mateo, Santa Clara, Sonoma, and the City of Berkeley recommend that everyone, regardless of vaccination status, wear masks indoors in public places to ensure easy verification that all unvaccinated people are masked in those settings and as an extra precautionary measure for all.

In June, the Delta variants comprised [43 percent of all specimens sequenced in California](#). The Centers for Disease Control and Prevention (CDC) noted that Delta variants are now responsible for [58 percent of new infections across the country](#).

Fully vaccinated people are well-protected from infections and serious illness due to known COVID-19 variants including Delta variants, and vaccinating as many people as possible, as soon as possible, continues to be our best defense against severe COVID-19 infection, and the harm it can do to our region. Vaccines are safe, effective, free, and widely available to everyone 12 and older.

Out of an abundance of caution, people are recommended to wear masks indoors in settings like grocery or retail stores, theaters, and family entertainment centers, even if they are fully vaccinated as an added layer of protection for unvaccinated residents. Businesses are urged to adopt universal masking requirements for customers entering indoor areas of their businesses to provide better protection to their employees and customers. [Workplaces must comply with Cal/OSHA requirements](#) and fully vaccinated employees are encouraged to wear masks indoors if their employer has not confirmed the vaccination status of those around them.

Bay Area Health Officers will revisit this recommendation in the coming weeks as they continue to monitor transmission rates, hospitalizations, deaths, and increasing vaccination rates throughout the region. Data can be monitored here: <https://covid.cdc.gov/covid-data-tracker/#county-view>

For masks to work properly, they need to completely cover your nose and mouth and fit snugly against the sides of your face and around your nose.

People are considered fully vaccinated 2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or 2 weeks after a single-dose vaccine, such as the Johnson & Johnson vaccine. People with only one vaccine dose of Pfizer or Moderna are not fully protected. Completion of the vaccine series is necessary to provide full protection.

Visit sf.gov/getvaccinated to learn where you can find a vaccination site near you or call 628-652-2700 to book an appointment, find a drop-in site, or if you have questions about the vaccine. If you missed your second dose, please find a vaccination clinic near you.

Mayor Breed announces SF is implementing a significant expansion of treatment beds for people suffering from mental health and substance use disorders

On July 22, Mayor London N. Breed and DPH announced that San Francisco is implementing the expansion of over 400 new treatment beds for people experiencing mental health and substance use issues. This expansion of treatment beds will provide more options for people in need to receive appropriate services that match their situation, while also providing San Francisco's new Street Response Teams with additional placements for clients they interact with.

The expansion plans represent a 20% increase in the City's residential treatment capacity. In 2021 alone, San Francisco will see 140 new beds opened, with significant progress made toward filling the gaps in critical needs areas identified in the 2020 Behavioral Health Bed Optimization Report. Since Mayor Breed took office, San Francisco has added more than 100 treatment beds across San Francisco's system of care.

These new treatment beds will allow San Francisco's new street outreach teams, including the Street Crisis Response Teams and the Street Wellness Response Teams, with additional placements that can serve the clients they interact with. There are now five Street Crisis Response Teams operating in San Francisco, responding to about 500 calls monthly. Mayor Breed included funding in this year's budget for five Street Wellness Response Teams, which will begin to respond to "wellness check" calls, which total roughly 17,000 annually.

The expansion effort is guided by recommendations from the Behavioral Health Bed Optimization Project report in 2020, as well as the Mental Health SF legislation in 2019, and utilization data that identified the types of treatment in highest need. These new beds and facilities are at various stages of development, with some ready for opening in 2021 and others in stages of planning and design.

Several innovative types of treatment and care programs designed to meet the diverse needs of people with behavioral health challenges are being developed, including:

- The 20-bed SOMA RISE Center will open in the fall of 2021 as part of the City's response to the drug overdose crisis. It will offer a safe indoor space for people who have used methamphetamine or other substances, monitor their health while intoxicated, and connecting them with other health and social services.
- A 10-bed residential treatment facility specifically designed to treat young adults with serious mental health and/or substance use disorders is under design.
- Neighborhood-based psychiatric respite facilities for people experiencing homelessness to shelter in a safe, supportive environment where they can also access ongoing care.

Meanwhile, as board-and-care homes shutter due to the escalating costs of housing, DPH is also in active negotiations to acquire facilities to accommodate at least 73 residential care beds to support people with mental health issues who require assistance with activities of daily living. Some of these will support the elderly. Critically, DPH is also creating 140 new beds to support people leaving residential substance use treatment – a last step in skill-building before independent housing.

In May, DPH, alongside community partners PRC/Baker Places, the Salvation Army, and Tipping Point Community opened Hummingbird Valencia, a psychiatric respite facility for people experiencing homelessness in the Mission and Castro neighborhoods. It is now operating at full capacity with 30 overnight beds and 20 daytime drop-in spaces.

For the latest update on San Francisco’s residential care and treatment expansion, go to: sf.gov/residential-care-and-treatment.

San Francisco has also made available a daily update of available mental health and substance use treatment beds at: FindTreatmentSF.org.

Board of Supervisors pass Mayor Breed’s final approved public health budget

On July 27, the Board of Supervisors passed on final reading the Mayor’s approved budget. Overall DPH’s budget remains at \$2.82 billion for FY 2021-22 and \$2.76 billion in FY 2022-23, with only minor changes described below. We are pleased that our proposed initiatives remain intact and additional critical services have been funded and are grateful for the support we have received from the Mayor’s Office and Board of Supervisors.

As part of the review by the Budget and Legislative Analyst, DPH’s budget was reduced by \$3.4 million in FY 2021-2022 and \$1.3 million in FY 2022-2023. The proposed reductions cuts are at a similar level those of prior years and represent less than 1% of DPH’s total budget. They are administrative in nature and will not affect our ability to deliver services or our ability to provide an effective COVID response.

Offsetting the reductions, the Board of Supervisors allocated back \$2.76 million in FY 2021-22 and \$1.683M in FY 22-23 for services at DPH. The programs initially assigned to DPH are outlined below.

Programs	FY2122	FY2223
3% CODB increase for Ryan White contracts, commensurate with General Fund CODB	350,000	350,000
Mental health services for long term HIV survivors	200,000	200,000
Support for a new LGBTQ health building in the Trans District	750,000	
Two additional staff positions to coordinate case management and case advocacy, housing and behavioral health access for community members facing barriers in navigating these systems	140,000	
Funding to continue a community-based partnership program for more localized, accessible food security through prepared meals and job training	125,000	-
Funding to continue a community-based partnership program for more localized, accessible food security through prepared meals and job training for D5 families	32,000	-
Funding for a drop-in center for PEH in the Haight, which is deeply needed to improve lives and connections to resources people need to exit homelessness	90,000	133,000
Funding to continue a community-based partnership program for more localized, accessible food security through prepared meals and job training	34,000	
HIV services for D10 residents	20,000	
District 11 CBO Convening on Mental Health	15,000	
Sustain services for survivors of Gender-Based violence in San Francisco with culturally specific programs.	1,000,000	1,000,000
Total	2,756,000	1,683,000

San Francisco and four other Bay Area counties join forces to #DeliverBirthJustice campaign to push for equity in Black maternal health and infant health

On July 22, San Francisco, in partnership with Alameda, Contra Costa, Santa Clara and Solano counties announced #DeliverBirthJustice (DeliverBirthJustice.org), a regional public awareness campaign that puts birth justice for Black families front and center in the fight for racial justice in the Bay Area. The regional campaign highlights racism as a crisis that results in the deaths of Black women and infants at a disproportionate rate compared to other racial groups.

The campaign is part of the Perinatal Equity Initiative, a statewide effort by the California Department of Public Health that identifies best practices to address the causes of persistent inequity and health disparities that threaten Black infant and maternal health. #DeliverBirthJustice aims to mobilize all corners of the Bay Area, from health professionals to policy makers to community members, to take action against social and environmental risk factors that harm Black families.

Research shows that Black babies in the Bay Area are two to three times more likely to be born too soon or too small, or to die before their first birthday. Black moms are three to four times more likely to die during pregnancy or childbirth. These disparities persist despite the level of education Black mothers have, their income, where they live, or their health habits. The structural and social racism Black people experience throughout their lives, and the bias they encounter from health professionals during their birthing experience, are the root causes. For example, Black women and birthing people in the Bay Area are twice as likely to live in poverty than other county residents and to report experiencing more hardships during pregnancy, such as homelessness, loss of a loved one or food insecurity. Almost half of Black/African Americans in California report that they have experienced unfair treatment getting medical care due to their race.

The campaign is informed by the testimonies of Black families from throughout the five counties, who shared harmful experiences with healthcare and other systems. Through the campaign, county leaders will provide in person and online opportunities for Black mothers and families to share stories related to birth justice.

Birth justice is even more pivotal during the COVID-19 pandemic which disproportionately affected Black and Brown communities nationwide. The campaign will work with policy makers to highlight policies that disrupt structural racism and help Black families have healthy births, such as improving access to safe and quality housing, nutritious food, and reliable and safe public transportation, as well as expanding health protections such as sick leave and family leave. Recommendations for health professionals include anti-racist and implicit bias training, partnering with doulas and midwives in hospitals, and implementing systems for reporting and addressing incidents of racism in health institutions.

For more information about the campaign, visit deliverbirthjustice.org.

Commissioner Comments:

Commissioner Bernal thanked Director Colfax for the report.

4) COVID-19 UPDATE

Grant Colfax, MD, DPH Director of Health, presented the item.

Commissioner Comments:

Commissioner Giraudo asked if the COVID-19 case data for unvaccinated individuals shows cases in individuals 12 years old and younger. Director Colfax stated that data does not show many cases in this cohort in San Francisco.

Commissioner Giraudo suggested that all DPH media pieces and town halls include strong encouragement for anyone who is 12 years or older, who will be returning to in-person school, to be vaccinated. Director Colfax thanked Commissioner Giraudo for the suggestion.

Commissioner Christian asked for the DPH view regarding the utility of testing and whether there will be an expansion of testing availability, noting the decrease in city-wide COVID-19 resources available during this surge. Director Colfax stated that the surest way to decrease prevalence of COVID-19 is to vaccinate. He noted that testing is an important component but without vaccination, it is not effective as a prevention method. He added that the 72-hour turnaround to receive a test result may be a challenge and that home test kits are an option too.

Commissioner Green stated that the Health Commission is concerned about the DPH staff workload and ongoing stress, particularly those who continue to be activated for COVID-19 duties. She offered the Commission's support to the DPH during this time. She asked for more information regarding strategies to address possible infections among vaccinated health care workers. Director Colfax stated that workers who are not fully vaccinated are getting infected at higher rates. He added that the city will have resources to care for those infected.

Commissioner Chow asked for more information regarding possible waning immunity from the original vaccines. He also asked for more information regarding home test validity. Director Colfax stated that researchers are looking into possible waning immunity from the vaccines. He noted that analysis of the recent surge of COVID-19 cases in Britain show that a combination of high vaccine rates and high prevalence of previous infection with the Alpha variant, may be responsible for the sudden decline in cases. He also stated that the DPH hopes to add information about home test kits on its website to provide some guidance.

Commissioner Bernal noted that there are currently 72 DPH staff members activated for COVID-19 duty compared to 600 CCSF staff activated earlier this year. He asked for more information regarding the toll this recent activation is having on staff. Director Colfax stated that DPH staff continue to be deeply dedicated.

Eighteen months into the pandemic, there are related physical and behavioral issues arising. He noted that many staff are working beyond their required 8 hours of work per day, which adds to their stress.

5) GENERAL PUBLIC COMMENT

There was no general public comment.

6) RESOLUTION: RAMAYTUSH OHLONE LAND ACKNOWLEDGEMENT

Mark Morewitz, Health Commission Executive Secretary, read the resolution. Dr. Jonathan Cordero, Founder and Chair, Association of Ramaytush Ohlone, was present to respond to any questions.

Commissioner Comments:

Commissioner Chow acknowledged the work of the DPH staff and Dr. Cordero in the development of the resolution. He is pleased that the DPH and the Health Commission will have an opportunity to address health disparities in a resolution currently being developed with the community.

Action Taken: The Health Commission unanimously approved the resolution. (See attachment)

7) PROPOSED RELOCATION: HARM REDUCTION THERAPY CENTER TO BE RELOCATE TO 21 MERLIN STREET, SAN FRANCISCO, 94107

Michelle Ruggels, Director, DPH Business Office, presented the item. Patt Denning, Harm Reduction Therapy Center Executive Director, was present to answer questions.

Commissioner Comments:

Commissioner Chow asked for more information regarding the reason for the organization's plans to move. Ms. Denning stated that the organization will be expanding services, including intensive treatment for those who have brief contacts with the Street Crisis Outreach Teams.

8) OFFICE OF HEALTH EQUITY UPDATE

Ayanna Bennett, MD, MS, FAAP, Director, presented the item.

Commissioner Comments:

Commissioner Chow thanked Dr. Bennett for the comprehensive presentation and reiterated his request for a Health Commission discussion on health disparities of individual communities. Dr. Bennett stated that her team is developing a health equity dashboard with 10 measures, which will give community-level and hospital-level data. She added that the DPH is still piloting its health equity tool which will help provide an equity perspective on all DPH work.

Commissioner Chung thanked Dr. Bennett for the amazing presentation. She is most interested in looking beyond health outcomes to examining structural issues. She encouraged the DPH to share its online modules in an effort to change structural issues within the City. Dr. Bennett stated that she will work with her team to share the modules. She added that the DPH is currently developing a history of neighborhoods to help staff understand this important information as part of their ongoing work with the community.

Commissioner Guillermo congratulated Dr. Bennett and the DPH for its exciting work. She is encouraged that the DPH will be sharing its trainings across city departments. She suggested that the trainings also be shared with DPH contractors. Dr. Bennett thanked Commissioner Guillermo for the suggestion.

Commissioner Christian recommended that required health equity trainings be necessary before contractors can do business with the DPH. She found the introductory Health equity module to be an extraordinary model in providing a foundational tool to learn about structural issues.

Commissioner Giraudo stated that the presentation and the online health equity training were excellent. She asked if the activities listed on slide 10 will be held in person or virtually. Dr. Bennett stated that all of the activities will be virtual meetings; she noted that some of the meetings will be held for live participation.

Commissioner Green joined her Commission colleagues in congratulating Dr. Bennett and the Office of Health Equity staff for the fantastic online training. She also encouraged the DPH to share its online trainings with other CCSF departments and community partners.

Commissioner Bernal acknowledged Dr. Bennett for her leadership role in COVID-19 Command last year, noting that she was still able to get an incredible amount of DPH-specific health equity work done in the last year. He added that the Commission is very grateful to her for this impactful work.

9) DPH HUMAN RESOURCES RACIAL EQUITY ACTION PLAN UPDATE

Luenna Kim, Director, presented the item.

Commissioner Comments:

Commissioner Giraudo asked for more information regarding the equity training for new staff members, including the expected timeline for staff to complete online modules. Dr. Bennett stated that on day two of the new staff orientation, staff are expected to complete online modules for: gender identity, trauma informed systems, and health equity.

Commissioner Giraudo asked for more information regarding additional health equity trainings after the orientation is completed, noting the importance of ongoing staff training. Richa Dhanju, Human Resources Manager, People Development Team, stated that prior to the COVID-19 pandemic, in-person health equity workshops were developed to encourage discussion of equity issues; she noted that there is currently a live-stream option which enables staff to participate in virtual discussions.

Commissioner Chow noted that decreasing structural issues that contribute to long hiring times is not slated to be completed until 2023. Ms. Kim stated that decreasing hiring times for all staff is a major priority for her department and the city.

10) FINANCE AND PLANNING COMMITTEE UPDATE

Commissioner Chung, chair, stated that the committee reviewed and recommended the items on the Consent Calendar for Health Commission approval.

11) CONSENT CALENDAR

Action taken: The Health Commission unanimously approved the following:

- **AUGUST 2021 CONTRACTS REPORT**
- **REQUEST FOR APPROVAL OF A NEW CONTRACT WITH UNITED AUDIT SYSTEMS, INC. IN THE AMOUNT OF \$1,499,621, INCLUDING A 12% CONTINGENCY, TO PERFORM REMOTE CODING SERVICES, FOR THE TERM OF JULY 1, 2021 THROUGH JUNE 30, 2022 (12 MONTHS).**

12) OTHER BUSINESS:

This item was not discussed.

13) JOINT CONFERENCE COMMITTEE AND OTHER COMMITTEE REPORTS

Commissioner Chow, chair, stated that at the July 27th ZSFG JCC meeting, the committee discussed a presentation on phase 2 of the CADDIE Project. This program was launched last year and attempts to improve

ambulance efficiency with taking patients to hospitals through a central coordination effort. The program provides suggestions to paramedics and ambulances regarding options of available hospitals. The initial launch of the program showed it to be effective. The evaluation of the project shows issues of provider compliance and dissatisfaction. Providers are responsible for delivering the message to patients that a possible preferred hospital may not be available due to diversion.

The Committee also reviewed and discussed the Regulatory Affairs report, CEO report, Human Resource Report, and Medical Staff report. In closed session, the committee approved the credentials report and PIPS minutes report.

14) ADJOURNMENT

The meeting was adjourned at 6:41pm in memory of Janice Mirkítani, Cofounder of Glide Memorial Church, artist, and community leader.

**Health Commission
City and County of San Francisco
Resolution 21-9**

RAMAYTUSH OHLONE LAND ACKNOWLEDGEMENT

WHEREAS, The San Francisco Health Commission acknowledges that the Ramaytush Ohlone are the original peoples of the San Francisco Peninsula; and

WHEREAS, The Health Commission acknowledges that the area comprising the City and County of San Francisco was originally inhabited by the Yelamu, an independent tribe of the Ramaytush Ohlone peoples; and

WHEREAS, Prior to the arrival of the Spanish in 1769, the Ramaytush Ohlone numbered approximately 1500 persons and lived in ten small tribal groups. By the end of the Mission Period, only a few families survived; and

WHEREAS, The Health Commission acknowledges that the Association of Ramaytush Ohlone has actively worked to research, expand public awareness, and preserve Ohlone history and culture; and

WHEREAS, The Health Commission acknowledges that the Ramaytush Ohlone peoples are not a mythical population of the past, but an integral and active community in the present San Francisco Bay Area region, and beyond, whose ongoing exclusion and invisibility threaten the greater American Indian community's inclusion and respect in San Francisco; and

WHEREAS, The Health Commission acknowledges that the City and County of San Francisco was founded on unceded territory, and continues to exclude the Ramaytush Ohlone peoples and by extension American Indian people in the San Francisco Bay Area; and

WHEREAS, The Health Commission acknowledges that the Ramaytush Ohlone peoples have survived the brutalities of colonialism, enslavement, genocide, discrimination, racism, gender-based violence, theft, forced assimilation, and other atrocities driven by local, stated, federal, and global governments; and

WHEREAS, The San Francisco Human Rights Commission published a report in 2007, "Discrimination by Omission: Issues of Concern for Native Americans in San Francisco," detailing the ways in which American Indian communities experience systemic erasure and exclusion in San Francisco, and identifying numerous recommendations for improved outcomes, and process which was guided by members of American Indian communities, including the Ramaytush Ohlone peoples; and

WHEREAS, It is important to acknowledge the truth of a land's history as a human right and demonstration of honor and respect for the contributions and sacrifices of the ancestors that inhabited and have cared for this land since time immemorial; and

WHEREAS, It is important to counter the narrative regarding the "doctrine of discovery" with the acknowledgement that there always have been thriving communities living on this land prior to the arrival of Europeans.

WHEREAS, A Land Acknowledgement is a formal statement that recognizes and respects American Indians as traditional stewards of this land and the enduring relationship that exists between American Indians and their traditional territories; and

WHEREAS, The Health Commission recognizes that the Land Acknowledgement Resolution is just the first step needed in acknowledging and honoring the land, culture, wisdom, and contributions of the Ramaytush Ohlone peoples throughout the San Francisco Bay Area;

NOW, THEREFORE, BE RESOLVED, that the following land acknowledgement will be read aloud at the start of each Health Commission and Department of Public Health meeting that is open to the public in accordance with Chapter 67.3(d) of the San Francisco Administrative Code:

“The San Francisco Health Commission/San Francisco Department of Public Health staff acknowledges that we are on the unceded ancestral homeland of the Ramaytush (rah-my-toosh) Ohlone (O-lon-ee) who are the original inhabitants of the San Francisco Peninsula. As the Indigenous stewards of this land, and in accordance with their traditions, the Ramaytush Ohlone have never ceded, lost, nor forgotten their responsibilities as the caretakers of this place, as well as for all peoples who reside in their traditional territory. As guests, we recognize that we benefit from living and working on their traditional homeland. We wish to pay our respects by acknowledging the Ancestors, Elders, and Relatives of the Ramaytush Ohlone community and by affirming their sovereign rights as First Peoples.”

I hereby certify that the San Francisco Health Commission at its August 3, 2021 meeting adopt the foregoing resolution.

Mark Morewitz, MSW
Health Commission Executive Secretary
