

**Ballot Simplification Committee - DRAFT for Consideration on Monday, August 1, 2011**  
**School District Student Assignment System** *(working title only, subject to change)*

**The Way It Is Now:**

The San Francisco Unified School District (School District) has established an assignment system for its students.

Parents may apply for their children to attend any school in the School District. If a school does not have space for all applicants, the School District admits students based on certain priorities.

For elementary schools, the School District considers, in order of priority, whether:

- older siblings attend the same school,
- the student lives nearby and attends a School District pre-kindergarten school in the area,
- the student lives in an area with low-performing schools,
- the student lives nearby, and
- the student lives in another area of the City where the schools do not have enough space for all students living in that area to attend.

For the 2011-2012 school year, parents were required to apply for their children to attend a middle school. Children received middle school assignments according to the same priorities that apply to high school assignments, as described below. For middle school assignments for the 2012-2013 through 2016-2017 school years, the School District plans instead to consider, in order of priority, whether:

- older siblings attend the same school,
- the student's elementary school is a designated feeder school for the middle school, and
- the student lives in an area with low-performing schools.

For the 2017-2018 and following school years, the School District plans to use another assignment system for middle schools that would send students from each elementary school to a designated middle school. If parents prefer a different middle school, they may request one. For such requests, the School District generally will consider the same factors as for elementary schools, in the same priority.

For high schools, the School District does not make any initial assignments. Parents must apply for their children to attend any school, and the School District considers, in order of priority, whether:

- older siblings attend the same school, and
- the student lives in an area with low-performing schools.

Parents may apply for their children to attend schools with language immersion or other special programs. The School District imposes additional eligibility requirements for those programs.

The School District is a separate governmental agency from the City.

### **The Proposal:**

Proposition \_\_\_\_ would make it City policy to encourage the School District to ensure that:

- all students have the opportunity to attend a quality neighborhood school;
- after assigning siblings to the same school, the distance from a student's home to the assigned school should be the highest priority; and
- the School District should provide students with the opportunity to attend schools with language immersion or other special programs, even if those schools are not located near their homes.

**A "YES" Vote Means:** If you vote "yes," you want to make it City policy to encourage the School District to place a higher priority on assigning students to schools near their homes.

**A "NO" Vote Means:** If you vote "no," you do not want to adopt this City policy.
