

# Where to get a flu shot

**During the COVID-19 pandemic, providers are taking every precaution to keep you safe, wherever you plan to get vaccinated.**

Additional safety measures include:

- vaccination services for sick and healthy patients in separate areas or at different times
- masking requirements
- additional disinfecting between appointments
- physical distancing in waiting areas

**For insured San Francisco residents,** flu shots are widely available at provider offices, pharmacies, and clinics.

- **Check first with your doctor's office or primary care clinic,** which is often the best and least expensive place to get vaccinated.
- Flu shots are available at retail pharmacies, like Walgreens and CVS. Call your local pharmacy to confirm that your insurance will cover a flu shot and to schedule an appointment.

Flu vaccines are available to the public at this San Francisco Department of Public Health clinic, many for free or at low cost.

- **AITC Immunization & Travel Clinic**  
101 Grove St., Room 102  
415-554-2625, [www.sfgdcp.org/aitc](http://www.sfgdcp.org/aitc)
