The Juvenile Probation Department is engaged in efforts to generate more comprehensive, accurate, and meaningful metrics.

This report compiles data through the month before last (December 2021).

- A small selection of the most recent month’s statistics are included: Admissions, Releases, Average Daily Population (ADP), and Alternative Placements
- A recent daily snapshot of the Juvenile Hall population will be included for the Commission meeting.

Starting on page 5, each chart slide is preceded by a definition/methodology slide explaining the chart’s content.

- A few metrics have shifted from last day of the month snapshots to average daily population to provide a more accurate representation of the Juvenile Hall population.

Time periods range depending on data availability and are noted on each chart.

Trends

In December 2021:

• For the 16 youth released from Juvenile Hall throughout December, the mean LOS was 18 days and the median LOS was 4 days.

• For the 16 youth in custody on December 31, the mean ALOS for youth in custody was 147 days and the median LOS was 74 days.
  • The long lengths of stay for youth in custody on the last day of the month were driven by commitments. The median length of stay for youth in Juvenile Hall for commitments was 144 days, while the median length of stay for non-commitments was 34 days.

Juvenile Hall Chart 4.1: Average Length of Stay (in Days) by Demographics

Charts 4.1 shows ALOS (mean and median) over time for: (1) youth released each month and (2) youth in custody on the last day of the month by gender and race.

Note: Due to the small number of youth in Juvenile Hall, averages by youth characteristics are often skewed by outliers. This is especially true for girls and non-Black youth who account for a smaller percentage of the Juvenile Hall population than their counterparts. To help account for this, both means and medians are provided.

Trends

In December 2021:
• The median length of stay for girls was longer than boys for youth released (5 days versus 3 days) and for youth in custody (96 days versus 74 days).

• The median length of stay was shorter for Black youth that for non-Black youth for youth released (3 days versus 21 days) and shorter for youth in custody (34 days versus 192 days).

  - Youth brought into custody pursuant to a court order, bench warrant, or arrest warrant.
  - Youth transferred in custody from another jurisdiction.

Active Caseload by Unit & Average Caseload Size

• Chart 2.2 shows active caseload by Unit by month, reflecting the most recent Unit restructuring that took place in August 2021, where JCRU and Placement were merged into a JCRU/Placement Unit and AB12 and RFA were merged into an AB12/RFA Unit.

• The average caseload size per case manager was 15 youth.
• AB12/RFA had the highest average caseload size per case manager at 27 youth, while CARC had the lowest at 7 youth.
