residential building containing 57 single room occupancy (SRO) units (29,704 square feet), and 410 square feet of community space on the ground floor. The project would provide 57 class 1 bicycle spaces within the building and four class 2 bicycle spaces on the sidewalks. No vehicle parking is proposed. The proposed project would include a total of 2,050 square feet of open space on the ground floor and on the roof. The proposed building would be supported on a mat foundation or drilled piers, involving 350 to 550 cubic yards of soil excavation. If piers are used for foundation support, approximately 60 16-inch-diameter auger cast-in-place piles would be drilled to a depth of 50 feet below ground surface.
