PROJECT DESCRIPTION

The Final Environmental Impact Report (EIR) certified in 1992 for the San Francisco International Airport Master Plan analyzed impacts from proposed land use and circulation projects on Airport property. One component of the overall Master Plan Final EIR included development of cargo facilities. The cargo facilities as envisioned in the Master Plan have been modified, and these revisions were evaluated in addenda to the FEIR published in 2003 and 2021. Following the publication of the 2003 and 2021 addenda, additional modifications to the cargo facilities were proposed. The additional modifications include demolishing Building 660 (Airport Post Office) and adjacent paved areas and redeveloping the site with interim and permanent remain overnight aircraft parking positions, a new Building 662, and an elevated walkway connecting Building 662 to adjacent Airport buildings. Building 662 would be a two-level, approximately 72-foot-tall warehouse building with associated vehicle parking and truck loading and docking areas. An elevated walkway would be constructed connecting Building 662 to Building 638 and the West Field AirTrain station platform to the east and the future Building 670 to the west. A segment of the existing vehicle service road would be shifted north to increase apron depth while continuing to conform to Federal Aviation Administration object free area standards for the adjacent Taxiway Z2.

DETERMINATION

The City and County of San Francisco, by and through the San Francisco Airport Commission, decided to carry out or approve the above-described Plot 10F Demolition and Paving and Cargo Building 662 project, on April 18, 2023. A copy of the document(s) may be examined at San Francisco International Airport, Bureau of Planning and Environmental Affairs, 674 West Field Road, 2nd Floor, San Francisco, CA 94128, in File No. 4020.149.

1. An Environmental Impact Report was prepared and certified pursuant to the provisions of CEQA.
2. A determination has been made that the project in its approved form will have a significant effect on the environment and findings were made pursuant to Section 15091 and a statement of overriding considerations was adopted pursuant to Section 15093.
3. Mitigation measures were made a condition of project approval.
