PROJECT DESCRIPTION

San Francisco International Airport is proposing the Shoreline Protection Program, which would install a new shoreline protection system around the Airport that would comply with current Federal Emergency
Management Administration requirements for flood protection against a 100-year flood and would incorporate protection from future sea-level rise. The proposed project would remove the existing shoreline protection features and construct a new shoreline protection system comprised of a combination of reinforced concrete and steel sheet pile walls. These structures would vary from one reach (a segment of shoreline) to another, depending on the existing site characteristics, and would range in height from about 4 feet to about 14 feet above the existing or newly graded ground surface, given that the elevation and slope of the ground varies for each reach. In total, the proposed project would construct an approximately 56,000-foot-long (approximately 10.6 miles) shoreline protection system, which would require approximately 26 acres of open water fill in San Francisco Bay and would impact approximately 3 acres of wetland areas.

DETERMINATION

The City and County of San Francisco, by and through the San Francisco Airport Commission (Airport Commission), decided to carry out or approve the above-described Shoreline Protection Program project, on July 5, 2023. The Final Environmental Impact Report (FEIR) was certified by the San Francisco Planning Commission on June 1, 2023, and the approval action by the Airport Commission occurred on June 20, 2023. The project was officially approved on July 5, 2023, when no appeal of the FEIR was filed. A copy of the document(s) may be examined at San Francisco International Airport, Bureau of Planning and Environmental Affairs, 674 West Field Road, 2nd Floor, San Francisco, CA 94128, in File No. 4149.

1. An Environmental Impact Report was prepared and certified pursuant to the provisions of CEQA.
2. A determination has been made that the project in its approved form will have a significant effect on the environment and findings were made pursuant to Section 15091 and a statement of overriding considerations was adopted pursuant to Section 15093.
3. Mitigation measures were made a condition of project approval.

Rich Hillis
Planning Director
