Project Description

SFMTA proposes to implement transportation safety improvements on Battery Street, between Market and Vallejo streets, and on Sansome Street between Market Street and Broadway as part of the Battery/Sansome Quick-Build Project (proposed project). The proposed quick-build project would create safer conditions for pedestrians and bicyclists by increasing bicyclist and pedestrian visibility and separating bicyclists and pedestrians from conflicts with vehicles along the project corridor. The proposed project includes the installation of a two-way (northbound and southbound) protected bikeway on the eastside of Battery Street between Market and Vallejo streets and associated color curb changes. The proposed project also includes pedestrian improvements on Sansome Street between Market Street and Broadway such as daylighting,

upgrading existing crosswalks to high visibility crosswalks, advanced limit lines, and traffic signal timing changes to extend pedestrian crossing time for people walking.

Determination

The City and County of San Francisco decided to carry out or approve the project on September 6, 2022, when the SFMTA Board of Directors approved the project. The project was officially approved on October 7, 2022, when no appeal of the statutory exemption was filed during the 30-day appeal period. A copy of the documents may be examined at the Planning Department, 49 South Van Ness Avenue, Suite 1400, San Francisco, CA, 94103 in file no. 2022-004864ENV.
