SUBJECT: Report on the Position-Based Testing Program

Executive Summary

This annual report is to update the Civil Service Commission (CSC) on the Position-Based Testing (PBT) Program from July 1, 2022 through June 30, 2023 in accordance with CSC rule 111A.5.2.

Background

CSC Rule 111A on PBTs was adopted February 6, 2006. Under the PBT Program, hiring departments or agencies are permitted to conduct recruitments in consultation with the Department of Human Resources (DHR). The program was intended to streamline the hiring of permanent employees by giving departments greater control over the exam process. The stated goal of the PBT Program is to adopt eligible lists resulting from merit-based exam processes within 60 days of the posting of a Job Ad.

Analysis

Table 1 on page two shows that 355 (61%) of this past year's 579 exams were PBTs. The number of PBT exams increased 20% compared to the previous year – 355 compared to 297. DHR believes that the increase is attributed to the termination of the various Mayoral Emergency Declarations, where human resources analysts were no longer deployed as Disaster Service Workers and could redirect their focus back to City hiring.

The table also shows that the median length of time to conduct PBT recruitments decreased to from 94 days to 84 days. While this still exceeds the 60-day goal it is at least a positive trend. DHR restarted exam-related training this Spring for analysts citywide and anticipates that a better-trained workforce may further the positive trend.

Protests/Appeals

Seven protests/appeals involving PBT examinations were received between 7/1/2022 and 6/30/2023 (see Attachment A). Six of the protest/appeals were administratively resolved by DHR and/or at the departmental level. One appeal of rejection of application received in mid-June is pending. The seven protests/appeals over 355 PBT processes yields a rate of less than 2%.

Probationary Releases

On March 3, 2015, the Civil Service Commission requested that future reports on PBTs include information about the number of employees released from probation as an indication of the "reliability" of the PBT program in predicting on-the-job success.

From July 1, 2022 through June 30, 2023, 111 employees were released from probation from the City and County of San Francisco, not including releases from CCD, CRT, MTA and USD. Of these 111 releases, 12 (11%) were originally hired from PBT lists. Eleven of these releases were non-disciplinary and one was disciplinary. Moreover, these 12 releases represent less than 2% of the 638 hires made from PBT eligible lists this fiscal year. The probationary releases were in the classes listed in Table 2 on page 3.

Conclusion

Seventeen years of data is ample evidence to conclude that the PBT Program has been successful in producing eligible lists faster for some classifications than Class-Based Testing without impacting the quality of the exam process. Appeals of PBTs occur in less than 2% of all cases and a retention rate of 98% [2% released from probation] strongly supports the reliability of the program. It is also particularly useful for those classifications wherein incumbent duties vary greatly across departments and even across divisions within departments. The PBT process enables those departments to target the specific duties that align with their vacancy.

DHR has heard from departments, however, regarding the heavy workload for independently-run PBT processes, and in line with the hiring modernization effort is shifting some of the more frequently-administered PBT processes [e.g., 124X and 182X] to a citywide CCT format. This format will establish continuous eligible lists in these classes, but departments will still be able to "filter" the candidate pool for specific candidate qualifications.

Recommendation: Adopt the report.
