Re: #231162

Accept and Expend Grant and Amend the Annual Salary Ordinance - Retroactive - Board of State and Community Corrections - Organized Retail Theft Prevention Grant Program - \$15,326,301

Honorable Members of the San Francisco Board of Supervisors,

We are writing on behalf of **Stop Crime Action** to express our full support of the proposed legislation that would allow the San Francisco Police Department (SFPD) to use Automated License Plate Readers (ALPR) to address public safety issues in San Francisco. Stop Crime Action is a 501c4 organization comprised of San Francisco residents committed to preventing crime in our neighborhoods, giving victims a voice, working to create a safe and sound city for all, while also supporting justice reforms.

San Francisco faces significant crime and safety challenges, including unusually high rates of property crime compared to other major U.S. cities, as well as understaffing of our police force, and more. These public safety concerns not only impact the daily lives of San Franciscans and the greater Bay Area but also unduly damage the public profile of our beloved city. It is critical that we implement solutions that address crime and support the acquisition of resources that foster safety. ALPR technology has proven to be a critical tool in helping law enforcement agencies across the state of California, and beyond, obtain the objective evidence they need to solve crimes in the community. Already utilized in approximately 1,000 agencies in California and dozens in the Bay Area, including but not limited to Oakland, Berkeley, San Mateo, Alameda County, Concord, Richmond, Palo Alto, San Jose, ALPR systems allow for comprehensive collaboration between regional agencies. Crime cannot be solved in silos and as the use of this technology expands, San Francisco must proactively participate in the broader safety network and utilize effective public safety technologies available to help address crime.

While recognizing we must immediately address crime issues within our communities, it cannot come at the expense of our collective values of justice and equity. Notably, the platform emphasizes collecting objective evidence while preserving privacy. ALPR systems do not include facial recognition technology or alerts containing personally identifiable information, data will never be sold to third parties, and all data is stored securely in the AWS cloud and

encrypted end to end. In accordance with 19B policy, LPR uses are strictly limited to public safety purposes like recovering stolen vehicles, apprehending individuals with outstanding warrants, investigating crimes, responding to Amber Alerts, etc., and alerts are focused specifically on vehicle-based data.

Importantly, funding for this technology is provided through the state and will not be an added cost to the city of San Francisco. We must leverage all the tools available to address crime through an approach that is ethical and objective. We urge members of the Board to approve this item and help our city thrive again.

Thank you for your consideration and willingness to engage on this important policy matter.

Sincerely,

**Stop Crime Action, BOD**
