

HIV Health Services

Performance Objectives FY 22-23

OVERVIEW - HIV HEALTH SERVICES PERFORMANCE OBJECTIVES FY 22-23

Measuring client improvement and successful completion of target objectives is an important part of SFDPH contracting. HIV Health Services (HHS) has created a group of performance objectives that are standardized across many service categories. The goal was to build from current objectives, and create meaningful, measurable, demonstrable objectives that will accurately reflect the good services that you provide to your clients, and will lead to a clearly understood and interpreted review of performance in meeting objectives.

These performance objectives are effective on the first date of the contract year for 2022-2023. For example, contracts with Ryan White Part A funding are required to begin using the new objectives on March 1, 2022, and contracts with General Fund dollars are required to begin using the new objectives on July 1, 2022. Contracts that contain more than one source of funding are required to begin using the new objectives on **whichever funding cycle is earliest**: in most cases this will be March 1, 2022. **If you are unsure as to when these objectives are effective for your program please call or e-mail HIV Health Services.**

Not all objectives apply to all programs. **All contractors and applicable program staff should review this document carefully including how program objectives are to be measured. To help identify exactly which document rows are applicable to the funded program(s) at your agency, consult both of the "Mapping" tabs at the end of the workbook. One mapping tab is labelled Ryan White and EHE and the other is labeled General Fund. If you still have questions please contact HHS: Maria.Lacayo@sfdph.org, 628-206-7677**

Contractors are responsible for compliance with all applicable items in the Performance Objectives and the Declaration of Compliance.

All SFDPH Performance Objectives may be located at: <http://www.sfdph.org/dph/cdta>
