

## Facility Maps

### Maps should not exceed 11" x 17"

Facility maps are intended to aid Emergency First Responders in the event of fires or other disasters. The maps should be clearly drawn and legible. There is no need to have the maps drawn by a professional. Maps with extraneous information (**i.e. engineering drawings & blueprints**) are unacceptable. To prepare facility maps:

- A. Use the standardized symbols found on the map key on the next page.
- B. **At a minimum, the map shall include (*if applicable*) the locations of the following, per HSC 6.95 25505(a)(2), 25508(a)(1):**
  - 1) North orientation
  - 2) Loading area(s)
  - 3) Internal roads and adjacent streets
  - 4) Storm and sewer drains
  - 5) Access and exit points
  - 6) Emergency shutoffs
  - 7) Evacuation staging area(s)
  - 8) Hazardous material handling and storage areas
  - 9) Emergency response equipment

Once the facility site map(s) minimum requirements have been met, upload an electronic copy to the California Environmental Reporting System (CERS).
