Cybersecurity

- Next-Generation Firewalls
- Network Security Assessment/Audit
- Network Assessment
- Vulnerability Scans, Internal and External Vulnerability Assessment
- Penetration Testing
- Email Threat Protection
- Cloud Security
- IoT Assessment (including sensors)
- Nessus Scans
- Identity and Access Management
- NIST, CIS, and Government Compliance

Network Infrastructure

- Network Design, Implementation, and Support
- Data Center (Internet Redundancy, Nexus, BGP, MPLS, IS-IS, OSPF, EIGRP, and Spanning-Tree Protocols)
- SD-WAN
- Converged + Hyper-Converged
- Virtualization + Storage
- Business Continuity & Disaster

Cloud Solutions

- AWS (Virtualization, EC2, VPC, Monitoring)
- Azure (Microsoft Entra ID, SAML, SSO, Virtualization)
- Google Cloud Platform (GCP)
- Oracle

Wireless

- Network Design, Implementation, and Support of Wireless Controllers and Access Points:
 - Cisco, Meraki, Ruckus, Aerohive, Aruba, Arista, Extreme Cloud IQ, Fortinet, Juniper MIST, Mikrotik, Ubiquiti, TP-Link, Cambium Networks

Supplier ID: 0000045732 **Contract ID:** 1000031429

NAICS Codes: 519190, 5415112, 541513, 541519, 531320, 561330, 611420, 423430, 334118, 513210, 238210

NIGP Codes: 20400, 20900, 92047, 92000, 92405, 72500, 91500

Business Certifications: City and County of San Francisco: LBE, Micro-LBE (GS027, CN060, GS126), CMD#10241000580

State and Federal: SBA 8(a), SB#1752041, SBE, DBE, MBE, WBE, WMBE, WBENC, EDWOSB, WOSB, LACMTA, CMAS

Electrical

- New Construction, Precision Estimates and Budgets
- EVITP Certified Electricians
- Level 1, Level 2 & Level 3 EV-DC
- Design Build Electrical Services
- Data Center: Design, Installation, and maintenance of
 - N+2 level power infrastructures
 - DC Plants
 - UPS-Battery Cabinets
 - Branch Circuit Panels
 - Collocations room

Physical Security

- CCTV, Surveillance Cameras, Physical Installation, Repairs, and Upgrades: Meraki, Axis, Cameleon, Pelco, Exacqvision, Genetec, and Iteris

Cablings

- Low Voltage (C-7 License Contractor #1086962)
- Network Cabling (New Installations, Upgrades, Expansions: CAT5\5E, 6\6A, 7, 8 Cables), Fiber Optics (New Installation, Upgrades, Expansion, and Terminations)

Other Services

- Managed Services
- Turn-key Solutions
- Lifecycle Management
- Procurement: Laptop, Desktops, Servers, Network equipment, Software, and other IT Supplies
- Commercial Off-The-Shelf Products and Services
- E-Commerce Store - coming in soon (Q2 2024)
- AI/ML
- Chat GPT
- Staff Augmentation
- Help Desk
- Project Manager
- Computer Repair

ACTNET

ADVANCED TECHNOLOGY

Your trusted technology partner
Get in touch at www.actnetsf.com

Our team has been delivering quality IT products and services to the greater Bay Area for more than 25 years. We strive for excellence and work diligently to provide service that is timely, friendly, reliable, and affordable.

We embrace changes and continuously expand our services to cover new technology products and systems. We love this industry because it has allowed us to become the trusted technology partner for many organizations and government agencies. Helping customers make the most out of their technology investment is simply our passion.

TECHNICAL SUPPORT SERVICES

- Contracted services for long term, short term, or as-needed, with full time or part time resources
- Field support or remote help desk operations
- Hardware, software, or network setup, configuration, and maintenance

REPAIR AND MAINTENANCE SERVICES

- Fast and reliable repairs on demand
- We work with a wide range of device types, brands and models
- We service desktops, servers, laptops, tablets, smart phones, displays, and office electronics
- Highly skilled chip level diagnostic, repair, upgrade, and replacement services

CONTRACTING AND SUB-CONTRACTING

- We believe in partnerships and joint ventures
- We are LBE Prime and a Sub to other Primes
- We are strong team players for mutual success

AUDIO, VISUAL, AND LOW VOLTAGE SERVICES

- Conversion and digitization services
- Editing, noise removal, and video captions
- Low voltage system design, installation and configuration
- Voice and data wired and wireless installation, termination, and testing

SYSTEM AND NETWORK INTEGRATION

- Solution design customized to each project
- Hardware & software integration for optimized performance and productivity
- Cost by contract or time and materials used

VALUE ADDED RESELLER

- Sale, service, and configuration of a wide range of IT products, network devices, peripherals, audio visual equipments, security cameras, electronic components, parts, and accessories

CERTIFICATIONS

- CCSF WBE LBE
- #CMD112016928
- CS & MIS Degrees
- CompTIA A+ Certificates
- CA C7 Low Voltage Systems Contractor #1034034
- CA Electronic Service Dealer License #E75209

CONTRACTS

- CCSF Tech Market Place Prime Contractor In Commodity and Professional Services
- Micro LBE Contract in EQ108, GS109, GS027
- SFO Passenger IT Support LBE Sub-Contractor
- BOS and SFPL Audio Video Digitization & Captioning
- Set Aside Contract as a provider of IT, Audio & Visual Communications, Electrical Hardware & Software, etc

OUR TECHNOLOGY PARTNERS INCLUDE:

About ApisTech

We build tools that help governments improve services and keep pace with emerging technologies.

Apis Technology, LLC (ApisTech) is a California certified SBE and San Francisco certified Micro LBE. We take immense pride in supporting local government and strive to provide the most value to our clients.

Services

We specialize in the following areas and can support projects large and small.

Salesforce

We are Salesforce OEM & LBE partners and we have implemented more Salesforce solutions for the city of San Francisco than any other vendor, helping deliver over a dozen Salesforce applications for the SFMTA.

Examples of how Salesforce can be used:

- + build community portals to better interact with the public or external stakeholders
- + rapidly transition workflows from Access/Excel to modern cloud-based software
- + easily manage new permit programs/regulations/services
- + automate routine tasks and enable powerful notifications

Integrations

We have helped build and maintain many valuable integrations for the city of San Francisco. We are comfortable working with just about any technology or database out there.

Examples of Integrations that have proven useful to other agencies:

- + integrate with Data SF's public data library to either retrieve or publish public datasets
- + integrate 311 cases with Salesforce to automatically route and track issues related to your department
- + integrate with other agency databases and tools to help streamline or automate communications and data sharing
- + integrate ArcGIS with Salesforce to bring powerful GIS tools inside of business applications

Data Services

Data underlies every important decision made in government today. We can assist in developing this value in many different ways, including data analysis, data processing and even data architecture.

Examples of data projects we have led:

- + processing telemetry data to catch commuter shuttle permit violations
- + measuring the effects of meter maintenance issues on parking revenue
- + analyzing a decade of transit vehicle accidents to determine primary factors
- + finding conflicts across all street-use-permit databases

Project Support

Few things affect the integrity of our local government more than project delivery. We can provide experienced project support personnel who can help navigate and mitigate project risks, ensure on-time delivery, support requirements gathering, provide system/technical analysis, and user-story refinement.

Examples of Project Support we can provide:

- + timely assessments of business and technical challenges
- + project management support/contractor monitoring
- + Quality Assurance management
- + documentation and training

Capital Partnerships Inc.

Capital Partnerships Inc. is a California Subchapter S corporation that was founded by Dave Schwartz in May 1990. Capital Partnerships is 100% veteran-owned. Dave Schwartz, Senior Principal and sole employee, has 47 years of experience in providing consulting services to state and local governments:

- **Project management (PM):** provide multi-year project management services that include planning, MS Project schedule development/tracking, budget development/tracking, and progress reporting.
- **Information systems:** provide technical assistance (TA) in all phase of information systems design/development/implementation from initial project planning through go live and close-out.
- **Cost-of-service and cost recovery analyses:** develop financial systems/procedures to allocate indirect costs; prepare cost plans to recover costs from federal/state grants or under cost-sharing arrangements with other jurisdictions; and analyze rates/charges for local government enterprises.
- **Operations analyses and business process improvement:** analyze operations and administration of local and state government agencies to determine areas and ways in which they can improve customer service and/or improve the delivery of capital projects and programs.
- **Management audits, program evaluations, and governance assessments:** perform either comprehensive or focused evaluations of public sector operating and capital programs to enhance the efficiency, effectiveness and economy of agency programs and to improve accountability for results.
- **Strategic planning and organizational development:** facilitate strategic planning processes for state and local government agencies, help agency staff in developing program outcomes and performance indicators, and advise agency management on organizational transformation, cultural change, staff development planning, and succession planning.

Capital Partnerships is certified as a small business enterprise (SBE) and/or local business enterprise (LBE) by the following agencies.

Agency	Certification / Number / Period Covered
CCSF – Contract Monitoring Division (CMD)	Micro-LBE – CMD051911033 – Computer Services (GS109), Computer Training (GS121), Financial (PS041), Facilitation (PS031), Records/ Info. Mgmt. (PS015), Regulatory Compliance (PS018) - 5/1/2022-5/31/2025
San Francisco Bay Area Rapid Transit (BART)	Small Business Entity & Micro-Small Business Entity under disadvantaged business enterprise program – open-ended

Capital Partnerships has master service agreements with (or has been prequalified by) the following City & County of San Francisco (CCSF) and other local agencies.

AUDIO VISUAL SERVICES

CAPABILITY STATEMENT

COMPANY PROFILE

Digital Disclosure is a San Francisco-based audiovisual design and installation company that serves the greater Bay Area. Since our establishment in 2017, we have earned a solid reputation by consistently delivering exceptional projects. Our core focus is on providing scalable staff for the installation, service, and maintenance of audiovisual peripherals in professional workspaces.

At Digital Disclosure, we specialize in a wide range of services, including digital signage, wayfinders, integrated video conference room systems, all-hands public address systems, broadcast systems, and live stream solutions. Our comprehensive offerings also encompass enterprise audiovisual project installations, yearly service line agreements, and custom audiovisual design integration for design-build projects. Our ultimate goal is to provide practical solutions that enhance communication within commercial workspaces.

By leveraging the most cutting-edge technologies available, Digital Disclosure is able to effectively translate our clients' visions into reality. We pride ourselves on delivering top-notch service and equipping our clients with the necessary tools to achieve their goals.

KEY DIFFERENTIATORS

- Technology-driven processes and mastered principles to optimize scheduled deliveries and cost savings to are clients
- Thorough understanding and ability to rapidly adapt and supply
- Proven track record for repeat business through customer satisfaction

Farallon Geographics builds location-based functionality into an organization's existing line-of-business and enterprise workflows. Our developers can create custom GIS applications and integrate the full range of GIS vendor products (Open Source, ESRI, Hexagon, AutoDesk, Oracle Spatial).

Farallon Geographics provides solutions for Plant GIS, Sewer Service Charge Billing Applications, Arches (a fully customizable geo-spatial enabled enterprise solution), Asset Management Applications, and Secure Application Hosting, Backup and Data Storage.

FLUENCY CAPABILITIES

- Arches Platform
- Arches Collector
- Arches/ArcGIS Plugin
- Full suite of Esri Enterprise GIS
- Python – particularly using the django framework
- Elastic Search
- Javascript (Node js, Vue, D3)

- Sophisticated spatial sql
- Mapbox toolset, including Mapbox G
- Mobile – Android and iOS – development
- RDBMS: Postgres, Oracle, Sql Server
Nosql Databases: Mongo, Couch
- Amazon Web Services

- Asset Management
- Enterprise Addressing
- Geodatabase Design
- GIS IT Integration
- GIS Needs Assessment
- GPS Field Data Collection
- Network GIS
- Notification
- Open Standards

- Pavement Management
- Property Review
- Spatial Data Processing
- Strategic Planning & Training
- Transportation & Linear Networks
- Utility System Data Modeling
- Web Applications

We'd love to learn more about your particular GIS needs, and we're confident we can help. Please don't hesitate to kick things off with a call 415-227-1140 or <https://www.fargeo.com/contact/>

About GenSigma

GenSigma delivers information technology and staff augmentation services to the federal, state, city, local government agencies, and commercial organizations. We are supported by a team of highly skilled professionals with decades of experience to provide state of the art solutions and services to improve business performance and customer experiences.

Our goal is to power your enterprise with modern digital solutions by helping teams expand their business capabilities through domain expertise and innovation. Further, we aim to provide highly qualified professionals to meet the growing demand of today's recruitment landscape. Our offerings include full-time, part-time, and contractual professionals with a wide range of experience and expertise for long-term and short-term staffing requirements.

Core Competencies

DIGITAL

State-of-the-art digital solutions to drive innovation and achieve strategic goals through modernization initiatives that line up with your business objectives.

DATA

Power your digital-initiatives with a robust-data infrastructure to accelerate your data journey through modernizing data architecture and enabling intelligent insights for your business.

NETWORK INFRASTRUCTURE & CLOUD

Experience faster design, integration and operation of both physical & cloud journeys to improve operational efficiency. Our expertise spans across every technology and operational layer in the data center and cloud environments.

STAFFING SERVICES

Identify and hire employees to meet the specific needs of your organization and overcome the challenges faced by hiring managers to meet the growing demand for a diverse range of professionals who can work the way you envision with our highly reliable staffing solutions.

We Are Government Technology Partners

Why Choose Us

Trusted Partner

We all want a **partner who has done it before**. Our recipe for success is simple! Every solution we bring, is **tested by another California agency**. The service, support and solution that we offer is solving a need that another agency identified and helped us design.

Business Concept

Our model has always been focusing on democratizing access to **Talent and Technology for Government**. Where we don't have that solution, we find the best in business, we merge our capabilities together to modify a **working solution** for CCSF. User adoption is key!

Strategy

Our customers drive innovation of our services and we are constantly challenged by them. We measure our success by our ability to provide **reliable** and **scalable** solutions that aligns and **evolves** with dynamic **priorities of CCSF!**

“Our job is to look well **beyond what CCSF** needs today, what technology is available outside TM 3.0 and how we can **make it better!**”

Our Service offering!

- ✓ Professional Services & IT Staff Augmentation
- ✓ Systems Integration and Legacy Data Migration
- ✓ Network Infrastructure Modernization & Design
- ✓ Application Design and Development
- ✓ Data Analytics & Business Intelligence
- ✓ Cloud Architecture and Migration
- ✓ Business and Enterprise Solutions

About Andax

We believe in “**Purchase with Purpose for Public We Serve**”. We are a small team of Government Practitioners with deep understanding of government technology, pain points and proven mastery of SAFe Agile framework. Every Tax dollar counts - implementing savings!

About ApisTech

We build tools that help governments improve services and keep pace with emerging technologies.

Services

We specialize in the following areas and can support projects large and small.

Salesforce

We are Salesforce OEM & LBE partners and we have implemented more Salesforce solutions for the city of San Francisco than any other vendor, helping deliver over a dozen Salesforce applications for the SFMTA.

Examples of how Salesforce can be used:

- + build community portals to better interact with the public or external stakeholders
- + rapidly transition workflows from Access/Excel to modern cloud-based software
- + easily manage new permit programs/regulations/services
- + automate routine tasks and enable powerful notifications

Integrations

We have helped build and maintain many valuable integrations for the city of San Francisco. We are comfortable working with just about any technology or database out there.

Examples of Integrations that have proven useful to other agencies:

- + integrate with Data SF's public data library to either retrieve or publish public datasets
- + integrate 311 cases with Salesforce to automatically route and track issues related to your department
- + integrate with other agency databases and tools to help streamline or automate communications and data sharing
- + integrate ArcGIS with Salesforce to bring powerful GIS tools inside of business applications

Apis Technology, LLC (ApisTech) is a California certified SBE and San Francisco certified Micro LBE. We take immense pride in supporting local government and strive to provide the most value to our clients.

Data Services

Data underlies every important decision made in government today. We can assist in developing this value in many different ways, including data analysis, data processing and even data architecture.

Examples of data projects we have led:

- + processing telemetry data to catch commuter shuttle permit violations
- + measuring the effects of meter maintenance issues on parking revenue
- + analyzing a decade of transit vehicle accidents to determine primary factors
- + finding conflicts across all street-use-permit databases

Project Support

Few things affect the integrity of our local government more than project delivery. We can provide experienced project support personnel who can help navigate and mitigate project risks, ensure on-time delivery, support requirements gathering, provide system/technical analysis, and user-story refinement.

Examples of Project Support we can provide:

- + timely assessments of business and technical challenges
- + project management support/contractor monitoring
- + Quality Assurance management
- + documentation and training

KEY PARTNERS

WHERE PASSION DRIVES INNOVATION

www.axelliant.com

Dear City and County of San Francisco,

Beacon Hill Technologies is a new Tech Marketplace vendor of IT consulting and staffing solutions. We specialize in providing top-tier services to help organizations achieve their IT goals and improve their overall performance. With a proven track record of success with organizations such as Sacramento County, UC Davis Health, State Compensation Insurance Fund, Department of Parks and Recreation, and many others. We have built a reputation for excellence in the industry, and we are proud to offer our services to partner agencies within CCSF.

Beacon Hill Technologies offers a wide range of IT consulting and staffing services to meet the unique needs of our clients. Our services include:

- **IT Consulting:** Our team of experienced IT consultants provides expert guidance and support to help organizations achieve their IT goals. We work closely with our clients to develop customized solutions that meet their specific needs and budget.
- **Staffing:** We provide top-tier IT talent for temporary, temp-to-perm, and permanent staffing needs. Our team of recruiters works tirelessly to find the best talent for our clients, and we have a rigorous screening process to ensure that our candidates have the skills and experience necessary to excel in their roles.
- **Project Management:** Our project management services help organizations successfully plan, execute, and deliver IT projects on time and on budget. We work closely with our clients to identify project requirements, develop a project plan, and oversee the execution of the project from start to finish.

Beacon Hill Technologies has a team of highly skilled IT professionals with expertise in a wide range of areas, including but not limited to:

- Application Development
- Data Analytics
- Cloud Computing
- Cybersecurity
- Enterprise Resource Planning (ERP)
- Infrastructure Support
- Subject Matter Experts
- IT Strategy
- Project Management
- Programming

Our team members have experience working in a variety of industries, including government, healthcare, finance, and technology, and we are committed to providing exceptional service to all our clients. I will personally work with stakeholders to ensure that consultants are matching and/or exceeding expectations and will be readily available to ensure that Beacon Hill is matching expectations established through our submission responses. Beacon Hill is excited and ready to be an integral partner to you.

Sincerely,

Brandon Plath

canaudit.com

Introduction

Canaudit is an IT audit and security consulting firm, specializing in network penetration testing, vulnerability assessments, web application security assessments, and other IT-based audits.

With almost 30 years of experience in the industry, our services are extensive in range and our proprietary tools help reduce the total time required for the audits while ensuring a full and complete scope. We have a broad spectrum of audit capabilities including network penetration and vulnerability assessment testing, IT policy reviews, social engineering tests, individual web application security assessments, database reviews and operating system audits. Our expertise spans many industries, including banking and other financial services, healthcare, education, retail, manufacturing, utilities, and local and federal government. Through comprehensive reports that provide insight on information security deficiencies, we help identify opportunities for improvement in complex business environments.

What We Do

Cloud Services Provider

We're an approved cloud services provider. We facilitate the co-creation of digital strategy and execution of end-to-end digital transformation solutions. We accelerate cloud adoption and migration, including the use of Azure cloud and Snowflake for enterprise data warehouse and reporting projects.

IT Professional Services

We cater to diverse technical requirements such as Cleansing, Migration & Integration, Project Management, Business Analysis & UAT for SQL and Salesforce needs within Property Assessment Systems. We offer engineering for Cisco and ServiceNow technology. CCS has experience providing Web Design, Cybersecurity, and Power Platform development for Human Services Agencies. We also have a trusted network of LBE partners, experienced with Wireless Infrastructure engineering for Airports and Drupal Development for Health Systems, amongst many other technologies and domains.

Transportation/Public Works & Utilities

We help transportation, public works, and utilities agencies modernize, manage, maintain their IT systems via enterprise implementations with hybrid delivery models. Our experience includes data warehousing and analytics (Azure & Snowflake) for transportation agencies, Geographic Information Systems (GIS), and asset management (Maximo).

Specialized Training

CCS Learning Academy (CCSLA) offers a wide range of Training services. We curate and deliver professional training for individuals, groups, government and private entities. We are a Microsoft Authorized Education Partner and approved by California BPPE as an authorized Education provider as well as partners with (ISC)2, CompTIA, PeopleCert, PECB, and ISACA.

Helping Our Customers Change the World

WHO WE ARE

Our Purpose is helping our customers change the world. To support this, we build long-term trust with our customers, our people, our partners, our communities and our shareholders. Our customers are some of the world's greatest organizations, in both the corporate and public sectors. They make world-changing decisions and investments, and while we do not change the world ourselves, we enable success for our customers so that they can realize the transformative benefits of information technology for their organizations, people, and the world. We work hard to get to know our customers, understand their needs and put them at the heart of everything we do.

WHAT WE DO

Computacenter is a leading independent provider of IT infrastructure services, enabling users and their businesses in a digital world. We advise organizations on IT strategy, implement the most appropriate technology, optimize its performance, and manage our customers' infrastructures. In doing this, we help CIOs, and IT departments in enterprise and corporate organizations maximize productivity and the business value of IT for internal and external users.

We help our customers to Source, Transform and Manage their technology infrastructure to deliver digital transformation, enabling people and their business.

CLIENT-FIRST SERVICES, SUCCESS-CENTERED SOLUTIONS

At Computacenter, our lifecycle services are designed and customized to meet our customers' everchanging needs. We are the experts at managing all aspects of the infrastructure lifecycle and offer a comprehensive range of services to source, transform and manage all your technology investments.

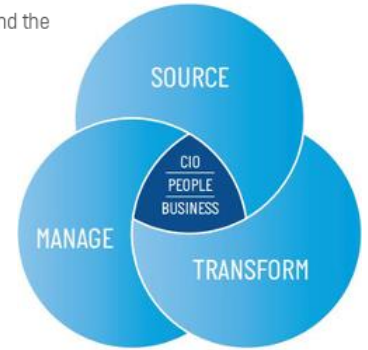

We provide independent and pragmatic advice to help you evaluate and select the right technology and help you source it to obtain the best value. We are vendor and technology agnostic and leverage our powerful partnerships to provide maximum flexibility and choice.

Our integration centers are an essential part of our lifecycle services yielding supply chain predictability and staging to make deployment simple, consistent and rapid. We deliver at scale with hardware and software integration, build management and asset tagging so that your technology is ready to use out-of-the-box. With our consulting and field services capabilities, we support our customers with post implementation, validations and design optimizations.

At end of life, we proactively engage with your team to notify and schedule the upcoming refresh and redeploy. Old technologies are sustainably disposed of at our state-of-the-art recycling facilities. Our international presence and capabilities enable us to deliver the same service seamlessly irrespective of geography.

PARTNERSHIPS

We hold over 200 vendor accreditations. Our people hold over 10,000 vendor technical certifications. These partnerships add value to our customers in making digital work, helping us to give impartial advice. Our breadth of partners enables us to integrate technologies and create solutions perfectly aligned to our customer's requirement.

STATE-OF-THE-ART INTEGRATION CENTERS

Computacenter integration centers are purpose-built on a common operating platform to enable our customers to rapidly deploy technology, at scale, across the US and internationally. Our centers enable customers to avoid much of the disruption of an onsite deployment by delivering fully configured and integrated solutions to the data center for plug-and-play installation. We also facilitate large-scale rollouts of desktops, mobile devices and other equipment.

Computacenter integration centers are built with a focus on quality and operational excellence, located in proximity to key markets, reducing carbon emissions and delivering same-day and next-day services.

Whether it's end-user, networking, or data center, we provide best-in-class warehouse automation, staging services, hardware and software integration, and asset tagging. Your technology is ready for immediate use by your users or deployment straight into your data center.

We stand by our commitment to ensuring sustainable operations employing eco-conscious packaging and delivery solutions to get your technology onsite with minimized waste and environmental impact.

C1 PORTFOLIO OVERVIEW

UNLEASH THE POWER OF **CONNECTED** CUSTOMER EXPERIENCES

Elevating Connected Human Experiences

In today's hyper-competitive world, you must fully leverage technology to gain a competitive advantage. Technology systems built in the past lack the agility, scale, and speed to support today's business requirements. Many organizations are facing the need to upgrade their mission-critical systems and execute complex modernization and cloud transformation at scale to improve the way they engage and service their customers and advance the way they enable work.

C1 is transforming the industry by creating connected experiences that make a lasting impact on our customers, colleagues, and communities. By embracing the power of change, we're finding new ways to help today's digital pioneers tackle the unknown, increase competitive edge, drive continuous innovation, and deliver extraordinary value in business and beyond.

Transformation Begins Here

We offer a comprehensive range of secure, on-demand IT services and solutions tailored to your needs. Whether you're looking to reimagine customer interactions, enable the future of work, or build a cyber-resilient enterprise, we leverage our relationships with today's leading technology companies to understand your desired business outcome and fast forward your journey to get there. Our team of experts is committed to designing transformative solutions that solve your unique challenges, elevate your customer experiences, and unlock real value. Together, we'll open doors to digital transformation.

Solution Brief

Insight

Drive speed, scale, resilience, and innovation with Insight — your end-to-end Solutions Integrator (SI).

Getting ahead of the competition — and staying there — is harder than ever. Businesses are facing legacy infrastructures, outdated processes, resource constraints, and cyberthreats. They're also juggling the demands of the modern workforce and seemingly infinite data. The roadblocks to business transformation are many. But the potential for innovation? Limitless.

Top performers are agile. Resilient organizations are secure. And today's innovators are tomorrow's key players. Set yourself apart with Insight — we'll help you drive transformation and modernization through an intimate understanding of your needs, vast technology expertise, comprehensive services, including product strategy, app development, and support for Agile and DevOps practices, and a broad portfolio of industry partnerships.

Prioritizing possibility in three key areas

Every client engagement supports innovation by prioritizing one or more key business outcomes.

Optimize your data for better business.

Empower speed and scale of service.

Drive security for business resilience.

Areas of expertise

Our work with clients spans six critical areas: Modern Workplace, Data and AI, Cybersecurity, Intelligent Edge, Modern Apps, and Modern Infrastructure. With proven methodologies and experienced teams, we help enable operational efficiencies, gain business agility, mitigate risk, manage compliance, address spiraling data growth, and meet the demands of the modern workplace.

Modern Workplace

Modernize essential workplace products, platforms, and workflows for secure productivity and flexibility.

Data and AI

Modernize data architectures and build analytics and AI solutions to transform operations and user experiences.

Cybersecurity

Improve security and reduce complexity with solutions that mitigate risk and strengthen your overall security posture.

Intelligent Edge

Identify and implement edge solutions that drive business value and support advanced IoT initiatives.

Modern Apps

Build modern business applications with repeatable methodologies and an agile approach to differentiate your business.

Modern Infrastructure

Enable digital transformation spanning people, process, and technology across cloud, data center, networks, and the edge.

New Tech Solutions, Inc. (NTS) is a privately held, minority-owned, Small Business company headquartered in Fremont, California, and a leading Silicon Valley based Information Technology Solutions and Service provider to Federal and other Public Sector Government Agencies.

NTS solutions include Data Center Computing, Cyber Security, Cloud Computing, Unified Communications, Big Data, Virtualization and Storage. Our experts can help you plan and deploy technology that meets the highest standards for quality. NTS also specializes in manufacturing energy efficient custom configured High Performance Computing (HPC), AI/ML solutions, complex data storage, and highly efficient graphical and visualization computing solutions, to name a few.

In addition, NTS also provides an innovative problem - solving approach to IT solutions. By utilizing our array of professional IT services, you can receive the guidance and expertise you need to ensure your project is customized to your unique needs and a success. We specialize in: Enterprise Architecture, Software Development, Enterprise Application Integration and Migration, and Network Performance Management.

The NTS collaborative approach throughout the whole lifecycle of your project, produces an exceptionally customer-focused and efficient solution. For our customers in the Federal government, we handle large contracts, such as: GWAC's, Blanket Purchase Agreements (BPAs), Indefinite Delivery, Indefinite Quantity (IDIQ) contracts and GSA Multiple Award Schedules (MAS). Federal IT purchases can be complex. We simplify the process: from contracts to deployment.

WHO WE ARE

Slalom is a next-generation professional services company creating value at the intersection of business, technology, and humanity.

Our purpose is to help people and organizations dream bigger, move faster, and build better tomorrows for all.

WHAT WE DO

From strategy to implementation, our approach is fiercely human.

We deeply understand our customers—and their customers—to deliver practical, end-to-end solutions that drive meaningful impact.

We can help you specifically with:

- Data Strategy and data visualization
 - Tableau
 - PowerBI
- Cloud enablement
 - AWS, Microsoft Azure, Google
- Salesforce deployments
- Program/Project management
- Change Management/Strategy/Training
- Data warehouse services

LOCAL GOVERNMENT EXPERTISE

Slalom is a trusted partner to local government agencies across the United States. We are passionate about positively impacting the communities where we live, work, and play, and helping organizations thrive.

HOW WE'RE DIFFERENT

We take love seriously

So seriously that we measure customer love in 10 dimensions and use those metrics to guide our actions.

Head and heart in everything we do

We show up authentically and get to know you, always leading with empathy and kindness.

Deep connections, better outcomes

Our thorough understanding of partner technologies and priorities drives trusting relationships and exponential impact.

Momentum that outlasts us

We work *with* your teams every step of the way, teaching and empowering them to continue the momentum even after we leave.

Local soul, global scale

Because we live where we work, we're committed to our local communities and your long-term success—while also staying connected globally.

PARTNERSHIPS

We partner with over 700 of the world's leading technology providers to create extraordinary results for you.

Our expertise ensures that your data center is fully optimized to meet the requirements of your business. We work with you to make it a highly-provisioned and operationally efficient business asset: architectural excellence delivered alongside best-in-breed management solutions and an operational and service model tailored to your requirements.

Defining a strategy

To define a strong and successful data center strategy you need access to specialists, and to make sure that needs and requirements are captured and communicated to the right people at the right time. Proper data center development requires a diverse set of skills and a holistic approach.

The SoftNet Solutions consultative approach has been honed over years of practice to deliver just that: we get the whole range of skills working together—from IT consulting to engineering—to ensure that your data center meets all standards and exceeds your expectations.

A source of excellence

SoftNet Solutions has created a center of excellence for unified data centers. Our team members have accreditations from industry-leading vendors, and have expertise in all major virtualization and data center platforms, as well as storage, security, network and management provisioning solutions.

We work across every technology and operational layer in the data center. Whether you want to consolidate or virtualize your computing, storage or network environment, or transform management through aggressive operational automation, we can provide you with insight and practical solutions.

Selecting products

From mission-critical servers and complex wired and wireless networks, to high-end storage and operating systems and much more, we can help you choose the best products for your solution.

Because we are vendor- and platform-agnostic, we can focus on what is right for your solution, rather than for us or the vendor.

Servers and Storage

We can provide you with a certified, experienced, and proactive team of server and storage specialists who guide your project from start to finish, and help you optimize your computing environment by improving performance, utilization, availability, security and management.

To help you achieve those objectives we:

- Document your current server or storage situation
- Establish a server or storage management strategy and prioritization plans
- Assign appropriate availability for each data set
- Consider whether to consolidate or to use a storage area network (SAN)
- Centralize your server or storage management
- Create, modify, or update your organization's backup and disaster-recovery strategy.
- Business Continuity and Disaster Recovery

Business continuity and disaster recovery are critical, and our continuity planning is second-to-none. We provide a comprehensive range of services to ensure the continued well-being of your organization, giving you the peace of mind to focus on your business.

And if your infrastructure or IT environment changes as a result of a change of focus or strategy elsewhere in the business, we can help you transition your continuity and disaster recovery plans quickly and easily.

Our suite of services includes:

- Site-to-site replication
- Host-based replication
- Storage encryption
- Network convergence
- Storage-based replication
- De-duplication
- Storage virtualization

SSP DATA | WWW.SSP.COM

SSP Data's Mission

For over 40 years, our team at SSP Data has excelled in providing Information Technology solutions and services to empower the success of public and commercial enterprises worldwide by aligning their technology investments with their budgets, growth, and utilization strategies. To that end, we have focused on enabling our clients throughout the region to deliver business critical functions utilizing trusted, globally renown, and industry-recognized commodities and solutions.

Core Competencies

- Cybersecurity Solutions and Services
- Cybersecurity and Network Assessments
- Professional Services
- Managed Services
- Network Solutions and Services
- Cloud Solutions and Services
- Data Center Solution Design and Deployment
- Consulting and Technical Services

Our Partners

SSP has valued partnerships with leading technology providers in the industry including [Cisco](#), [Palo Alto Networks](#), [Mandiant](#), and more. Our partnerships give us the power, range, and flexibility to provide our clients with the most effective solutions to meet their needs. Through our combined efforts, we can extend our resources for information, training, and technology procurement.

Relevant Experience

As a Local Business Enterprise (LBE) and Minority Owned Business Enterprise (MBE), we seek to have our clients & staff reflect California's status as an inclusive and diverse technology leader. We support a variety of clients who are innovative, progressive, and looking towards the future while serving their communities. This includes:

- City and County of San Francisco
 - We support several City Departments, including the Department of Technology (DT), Office of Cybersecurity, San Francisco International Airport (SFO), Public Utilities Commission (SFPUC), the District Attorney's Office, and more.
- City of Richmond
- Port of Oakland
- Metropolitan Transportation Commission

Our goal at SSP is to uplift the Bay Area and surrounding Northern California region as a whole by strengthening technological and cyber resiliency with industry-leading and effective solutions, services, and trainings. Across over 40 years of operation, we have been able to support the delivery of critical services to public institutions throughout California, while building a collaborative approach focused on connecting technology leaders and practitioners from the state, local, and municipal levels. We continue to work with public organizations from across the region on developing governance, processes, and guidelines to support the overall resiliency at all levels of the enterprise.

Fast technological solutions

The Thier Group moves your project from concept to reality. Our expertise in computer hardware, software, computer system services, database development, and analyses, as well as computer training, will only help you accomplish your objective with the fastest and best technological solution possible. We have provided technology services and solutions to numerous government, industry, and professional clients.

Why Xtech?

We operate fully to serve the City and County of San Francisco.

Xtech brings a unique combination of skills to bear on our work with Governmental Agencies. We have been leaders in the previous Technology Marketplace Contracts for many years now and have established ourselves as a trusted partner for CCSF. We bring incredibly significant specialized expertise to San Francisco - from equipment procurement, network services, project management, system integration, hardware maintenance to software development and specialized training, we have offered and will continue to offer CCSF a complete IT solution tailored to meet your needs.

Xtech was founded in 2000 as a joint venture between two LBEs: 21Tech and Eaton & Associates. Xtech's has been focused on delivering the highest level of quality and expertise to the City and County of San Francisco (CCSF). Since then both JV parnters have graduated from the program, but our committment to supporting local businesses as we have exceeded our LBE goals for Our parent companies were founded in 1996 and 1989, respectively. Both firms were founded in San Francisco and remain headquartered in the Bay Area.

Our continued commitment to CCSF

- Negotiated over 500 sub-contracting agreements, including Enterprise Agreements for CCSF Depts.
- Leader in LBE participation over past three Tech Marketplace contracts
- Local warehouse and staged deliveries
- Local account management and pro-services teams
- Promote the highest level of care for City data, always ensuring security and confidentiality
- Subject matter expertise on City procurement policy
- Dedicated Xtech team averages 18 years active experience working with CCSF

Zones Connect

ZonesConnect is our web-based self-service platform that helps you to manage every aspect of your Zones account. Simply log in, you'll and gain deep visibility into your company's standards, quotes, orders, shipments, and more. You'll be able to streamline the entire procurement process – and save time and money for years to come.

- Instant product updates
- Updated to a modern look/feel
- Enhanced search standards
- Consolidated order lookup

https://www.zones.com/site/statics/static_page.html?name=corporate/about-us/zonesconnect-capabilities

Getting started is easy, too. Ask your Zones account manager to activate your free ZonesConnect site today.

Zones Cloud Platform

Zones Cloud v2.0 is our web-based self-service platform that allows clients to manage their cloud subscriptions through a single, centralized management console. Clients can easily purchase cloud services and manage associated subscription ordering using an intuitive online marketplace experience that offers self-service controls for each subscription.

Users of Zones Cloud v2.0 can leverage the platform for billing, invoicing, provisioning, reporting, identity management, and more. Plus, through our Cloud Solutions Marketplace, clients can enjoy easy access to numerous discounts and deals from Zones' cloud partners.

https://www.zones.com/site/statics/static_page.html?name=solutions/cloud-platform

myZones IT Order Management Software

myZones is a self-service IT order management software that streamlines ordering and inventory, custom reporting with real-time data. At Zones, we've been listening closely to client feedback, and consistently, we've heard that our clients want an easy, convenient way to check the status of their orders. myZones addresses that need by providing real-time reporting, order status, master tracking, inventory management and more.
