**Note:** This report compares a matched pair of CANS for each child/youth; the most recent CANS matched to next most recent CANS within an episode. The most recent CANS occurred 7/1/2020 - 6/30/2021. Items used are those of the Behavioral/Emotional Needs, Traumatic Stress Symptoms, Impact on Functioning, and Risk Behaviors domains. "Number improved" means number of children/youth episodes that showed improvements in at least 50% of the actionable items (those rated as either a 2 or 3 on the next most recent CANS). The number of points the program will receive on the BOCC monitoring report is based on the percent of children/youth episodes that achieve this 50% improvement benchmark as follows:

% of Clients Achieving the CANS Benchmark	Points
72-100%	5
64-71%	4
56-63%	3
48-55%	2
40-47%	1
<40%	0

Based on CANS pairs from data queried on September 13, 2021.
