Dear Police Department, I am writing to express my concern about a recent trend in burglaries where criminals are reportedly using WiFi jammers to disable security cameras and potentially disrupt residents' ability to call emergency services. As seen in a recent news report as seen in the video at <https://youtu.be/pMNOQNRANK4>, some burglars are exploiting these devices to bypass security measures. I urge the department to stay up-to-date on this emerging tactic and consider implementing strategies to address it. Here are some suggestions: Raise awareness: Educate the public about WiFi jammers and how they can be used in burglaries. Increase enforcement: Work with lawmakers to explore the possibility of making possession or use of WiFi jammers during a crime a more serious offense with increased penalties. Invest in detection technology: Research the feasibility of using equipment to identify WiFi jammers in operation. Thank you for your time and consideration. It is important for our community to stay ahead of evolving criminal tactics. For future communication, I would prefer to be contacted by email as I do not answer calls from unknown numbers.
